

SEAL Control Center

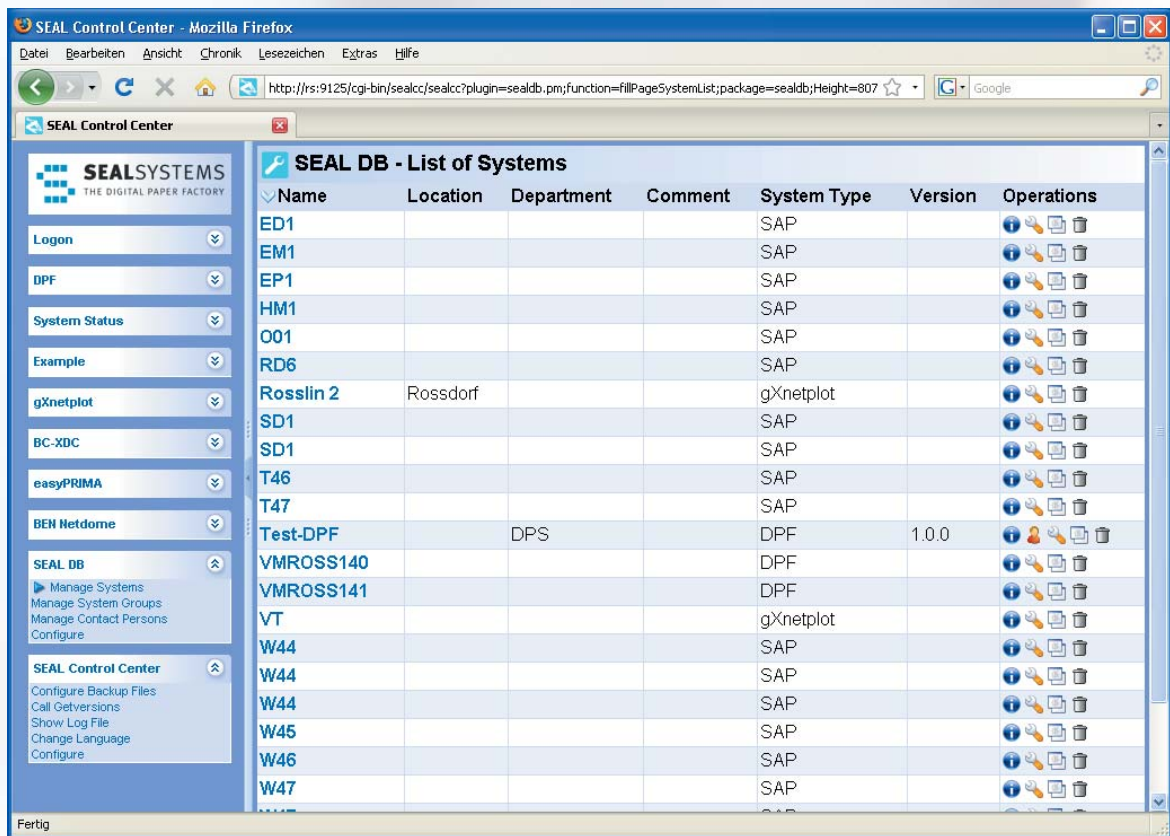

ADMINISTRATION OF SEAL SYSTEMS APPLICATIONS

// SEAL Control Center enables an easy **administration** of SEAL Systems applications.

The **system status** of different SEAL Systems applications and server processes is **displayed** and can be simply **changed**.

SEAL Control Center is **browser-based** and intuitively usable. Functions and services of SEAL Control Center are realised with Plug-ins.

SEAL Systems offers free-of-charge and charged plug-ins. With **documented, open plug-in-interface** applications can integrate own functions.

SEAL Control Center

FUNCTIONS OVERVIEW

- One **central environment** for all SEAL Systems applications
- Easy **monitoring** of SEAL Systems solutions
- Simple **administration** of SEAL Systems applications
- Integration of **customer specific applications** with plug-in interface
- User and rights management
- Suited for **multiserver environments** by using **browser technology**
- For **administrators and users**
- Embedding into other SEAL Systems applications, like SEAL Conversion Cockpit for SAP DMS

BENEFIT AND ADVANTAGES

- Concise review of all SEAL Systems servers
- Simplified failure recovery
- Higher system performance
- Reduced help desk and administration efforts

STANDARD PLUG-INS

Product	Function
PLOSSYS netdome	Start/Stop/Status
gXnetplot	Start/Stop/Status
DPF Server	Start/Stop/Status
DPF Tracker	Integration
SEAL SAP	
ConversionCockpit	Integration

SYSTEM ENVIRONMENT

For server and clients: Windows, Unix, Linux

CHARGED PLUG-INS

- Job search over several servers
- easyPRIMA – centralized device administration and distribution
