

FACTSHEET

PLOSSYS® netdome

PLOSSYS® Stamps and Watermarks

Stamps and watermarks are text-/graphic elements which enables the additional marking and indicating of drawings during the output.

■ Benefit

Status information about drawings, e.g. out of CAD systems or a digital archive, can be printed good visibly at the moment of the output. Therefore proceedings can be made safer and more transparent.

Stamps and Watermarks

Function

Depending whether a text/graphic element is defined as watermark or stamp, the output will be done before or afterwards the drawing. Watermarks are overlapped by the graphic, stamps overlap the graphic.

Form, orientation and position of the stamp or watermark are determined together with the user. The settings for the stamps can be determined in the moment of the output via a PLOSSYS® netdome header entry.

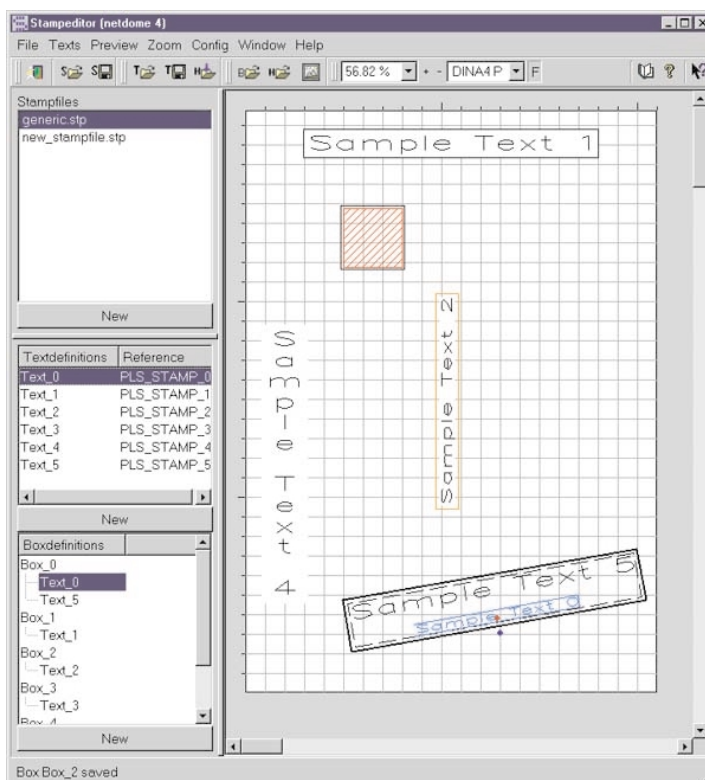

The output is possible on vector and raster drawings. The stamp function is a PLOSSYS® option.

Editor

For considering and changing of stamp layouts a stamp editor is delivered:

- Stamp preview
- Stamp configuration: Loading, copying, changing, storing
- Stamp positions
- Setting of pattern text
- Display and change of layout definitions: Text layout, box layout, color definitions
- Configure the stamp editor
- Able for run on each Windows workstation

This tool makes the mapping, maintenance and changing of stamp layouts faster and easier. There is need for costly settings and control prints.

Configurable Parameters

Text attributes

- Writing size
- Color
- Text alignment (centred, left or right aligned)
- Writing line width
- Font type, selection out of over 50 type styles
- Character separation and extension
- Mirrored text

Stamps and watermark attributes

- Position and size
- Angle of the stamp/watermark
- Drawing a frame (yes/no)
- Color of the frame
- Rotate stamps/watermarks with the drawing
- Scale stamps/watermarks with the drawing
- Definition of the content via metafiles (graphic)
- Deleting the background of a stamp or only showing the background of the text
- Repeated output of a stamp or watermark over the whole drawing is possible line- and/or columnwise.

The current date and time can be printed in format
DD.MM.YYYY HH.MM.SS

Characters

Amount of the stamps: max. 10
Amount of the textlines for each stamp: max. 10
