

FACTSHEET

Message Cockpit (MCO)

Your solution for fast and reliable feedback on orders through SAP

What is Message Cockpit?

The Message Cockpit supports employees in procurement who are responsible for processing and issuing orders. Issuing orders, i.e. transmitting information to suppliers, takes place via the SAP Message Control by email, fax, printing or other methods. Our Message Cockpit provides you a quick overview of the overall status of all processes triggered by a message.

We have expanded the SAP standard transactions (ME9 [A, E, F, K, L]) for message output so that in addition to the existing functionality, the status of the processes following a message can also be monitored. This applies to processes whose output was initiated via SAP Spool, SAP Connect or SEAL Systems' distribution methods.

By integrating Message Cockpit into SAP Standard Transaction, the user can work in the familiar SAP transaction environment. The learning curve is eliminated.

Message Cockpit (MCO)

What can Message Cockpit do?

In the overview of selected messages, the status of generated SAP spool requests, releases via SAP Connect or releases via SEAL Document Distribution Director are displayed in color in their own columns.

From here you can navigate directly to the applications to get detailed information. For example, you can go into Transaction SP01 to monitor the protocol of the SAP print release:

Output Controller: List of Spool Requests

System	Spool no.	Type	Clt	User	Date	Time	Status	Pages	Title
<input type="checkbox"/> X60	2419		020	SEAL2	21.09.2015	19:34	Compl.	3	Test Bernhard Schneider
<input type="checkbox"/> X60	2420		020	SEAL2	21.09.2015	19:34	Compl.	3	Test Bernhard Schneider

Or you can navigate to the SEAL Document Distribution Director. There you can go through the message to verify, correct or repeat the output documents to be distributed.

Who needs Message Cockpit?

All users who need a quick confirmation that your process was reliably completed (e.g. that an order was successfully issued to the supplier).

In the case of errors, the affected part of the process can be detected and corrected.

Message Cockpit (MCO)

Your benefits at a glance

- Complete integration into standard SAP business processes and applications reduces the user learning curve.
- Colored display of in-process and complete status enables a quick overview.
- Able to navigate to the following process via mouse click to get more information.
- Timely identification of problems in critical release processes.

Features

Integration

- Integration into SAP standard order transactions ME9[A,E,F,K,L] via EnhancementPoints.
- Integration into SAP standard transactions for sales orders, delivery, transport and billing on request.

Contents

- SAP Transport
- Documentation

System environment

SAP versions from release SAP ERP 6.0.

See all details for recommended computer equipment under

www.sealsystems.com/service-support/computer-equipment/

Monitored output processes

- SAP Spool
- SAPconnect
- SEAL Document Distribution Director

Language support

- Englisch
- German
- Unicode support
- Other languages upon request

Licensing
