

Factsheet: ZUGFeRD SUITE

Invoicing Made Easy! With SEAL Systems and ZUGFeRD

These days, invoicing tools are used to create and edit invoices. If you then want to distribute these electronically, additional solutions are needed. SEAL Systems AG, your experts for corporate output management and conversion, has an add-on program for distributing documents which can be easily integrated in the ZUGFeRD standard in any SAP invoicing process.

ZUGFeRD – What is it?

ZUGFeRD standardizes the exchange of B2B invoices, as well as between businesses and businesses and the public domain. With ZUGFeRD, business partners can exchange invoices without first having to agree on a format. A PDF/A3 file is used as a container for XML files. This PDF can then be read by the recipient, who is given the invoice data in structured form for further processing in their system, eliminating the need for manual recording of the invoice in the system or the use of additional OCR processes for recognition of invoice data. This simple and structured procedure should soon be standard in Europe.

The ZUGFeRD Suite from SEAL Systems

Our ZUGFeRD Suite acts as a support of electronic invoice exchange according to ZUGFeRD standards. We have used to our advantage the fact that ZUGFeRD invoice information is shown in the form of a PDF/A 3-document and at the same time as machine-readable XML attachment in the PDF document. SEAL Systems creates a link between the ZUGFeRD standards data and the SAP invoicing data, thus ensuring the straightforward distribution of the desired documents.

Our ZUGFeRD Suite supports the creation of invoices in all ZUGFeRD profiles (Basic, Comfort and Extended) and includes both the creation of outgoing ZUGFeRD invoices and the processing of incoming ones.

Outgoing ZUGFeRD Solutions - Features:

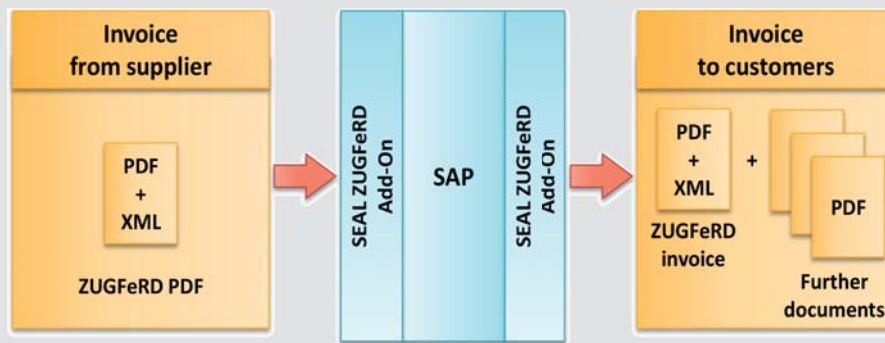

- Creation of outgoing invoices in ZUGFeRD format
- Adding of additional documents for ZUGFeRD invoices
- Monitoring solutions for outgoing ZUGFeRD invoices
- Support of customer-specific parameters over SEAL standard data collection

Incoming ZUGFeRD Solutions - Features:

- Automatic processing of ZUGFeRD invoices
- Monitoring solutions for incoming ZUGFeRD invoices
- Input channels:
 - Drag & drop of ZUGFeRD invoices in SAP
 - Processing of incoming ZUGFeRD invoices per e-mail
 - Outlook2SAP plugin for invoice filing directly from Outlook
 - HotFolder for the start of processing

Benefits:

- + SEAL Systems' solution integrates seamlessly into SAP standard processes.
- + With configurations, you can control which invoices should conform to ZUGFeRD.
- + Other documents, such as purchase orders, packing slips and service reports as well as drawings and documents, can also be automatically detected and added.
- + Document output can take place over various channels (e-mail, FTP, file system, portals, Sharepoint...).
- + No licensing of additional third-party products necessary.
- + Re-archiving of ZUGFeRD invoices is possible for corresponding invoices in SAP.

Integration

Print from SAP message control

Sprachunterstützung
