COMPANY-WIDE PRINTING FROM THE CLOUD? BUT OF COURSE!

The future is here. With our brand new Output Management System PLOSSYS 5, you can quickly and securely print from the cloud - independently of the manufacturer - whether on-site, via a public cloud or in your own private cloud.

Cloud Printing makes your printing process flexible, cost-effective and easy. And with SEAL Systems, it is even hardware independent.

Professional Output Management not available as a cloud service?
It is now! Use the convenience of the PLOSSYS 5 centralized printing system for Windows and SAP, without losing centralized management and monitoring of your output management environment. Optimize your printing processes for SAP, Windows, Engineering and mobile devices with the cloud printing solutions from SEAL Systems.

PRINTING FROM THE CLOUD ...

✚ **... does not require your own infrastructure.**
Simply book all required services as Managed Services.

✚ **... can be easily integrated in your existing application environment.**
Whether SAP, mainframe or Windows, the connection is made via the proven integration components from SEAL Systems.

✚ **... is easy scalable.**
Without additional hardware, print 100,000 pages today and 500 pages tomorrow. Only pay for what you actually use.

✚ **... also works well for diversified locations.**
Without additional infrastructure, print from different locations and of course from mobile or tablet.

✚ **... can be expanded seamlessly.**
You can quickly and easily expand your cloud installations for special services like stamps and watermarks. Uncomplicated connection to other cloud services is also possible.

✚ **... is secure.**
Our cloud products protect your valuable data from source to output with state-of-the-art security technology. This way, your output is delivered exactly where you need it.

On topic

„When properly utilized, the cloud is a powerful tool that simplifies IT environments, reduces expenditures and lowers management costs. Not every IT process is suitable for a cloud operation, but with sound judgement and competent partners, companies can save substantial costs – especially for standard processes such as output management."

Thomas Tikwinski, Head of development at SEAL Systems
