

# FACTSHEET

## Document Conversion Suite

### Document Conversion Suite for BC-XDC

#### What is Conversion Suite for BC-XDC?

Significant company files can be administered within various modules of SAP architecture. For many business processes or daily operations, it is necessary to convert these documents into a universal format for the purpose of distribution or long term storage.

#### What can Conversion Suite for BC-XDC do?

An SAP system is limited in its functionality to edit or print documents from external applications like Word, Excel, PowerPoint, CAD, etc or graphic formats like TIFF/G4 or PDF.

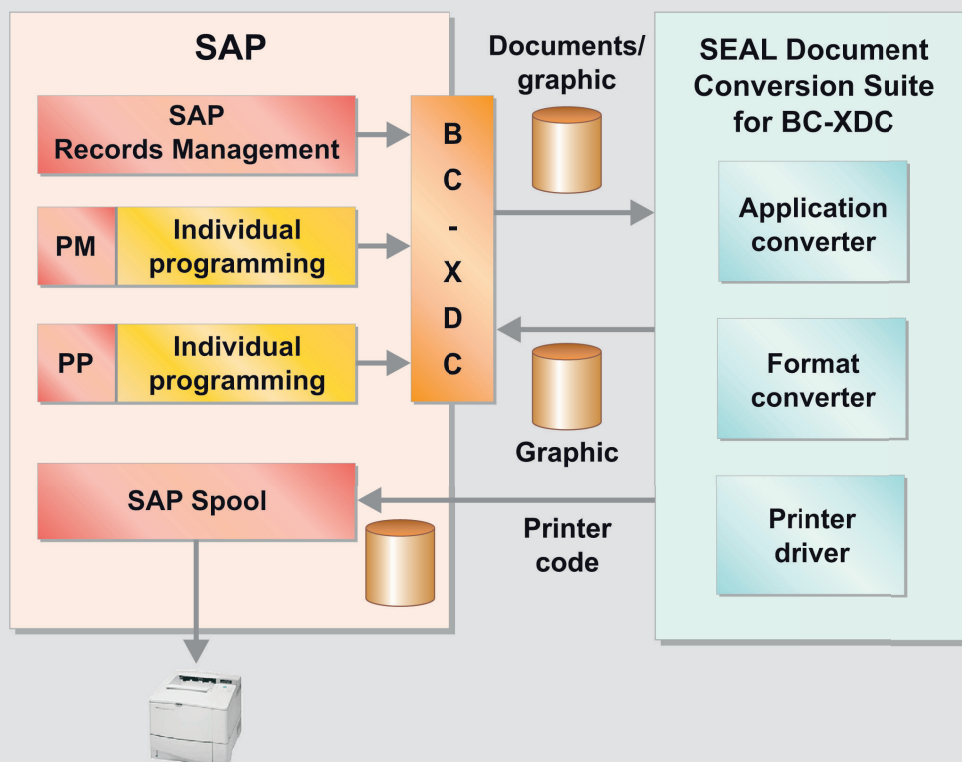

The method provided by SEAL for this requirement integrates within the BC-XDC (External Document Converter) interface.

The Document Conversion Suite for BC-XDC Includes a professional implementation of the interface with DPF technology from SEAL Systems

#### Who needs Conversion Suite for BC-XDC?

All SAP users, who want to processes, convert or output documents form other applications like Word, Excel, PowerPoint, CAD etc. or want to convert certain graphic formats as TIFF/G4 or PDF.

# Conversion Suite for BC-XDC

## Advantages at a glance

SEAL Systems has provided printing and conversion solutions for more than 30 years, becoming the market and technology leader in the industry.

The range of functionality for the BC-XDC implementation includes SAP Records Management, Conversion, Printing, and Composite Spool Requests. The solution supports 40+ files formats, ensuring a wide range of available input and output formats.

The conversion service is implemented in the new DPF technology (Digital Process Factory®) from SEAL Systems. This provides simple installation, configuration and administering of conversion processes.

## Input and output formats

Many input and output formats are supported, including all current Office, CAD and publishing applications, as well as more than 30 different graphic and text formats:

- Input file formats/Office: Word, Excel, PowerPoint, Visio, MS-Project
- Input file formats/CAD: AutoCAD, SOLIDWORKS, SOLIDEDGE,
- Inventor, UG, Catia, ME10, Pro/E
- Input file formats/Publishing: FrameMaker, Corel Draw,
- Input file formats/other: HPGL, HP-RTL, PDF, TIFF, PostScript, C907, CGM, more on request
- Output formats: PostScript, PCL, TIFF/G4, PDF, more on request

## Product code

DPF4BC-XDC

## Application integration

The call or use of the interface out of SAP modules can be performed by two different methods:

- Individual programming:  
Via BC-XDC e.x. print programs are enhanced by methods for document identification and conversion.
- SAP applications already consist of pre configured BC-XDC calls

The BC-XDC interface is commonly (WebAS 6.40 or higher) supported by SAP Records Management, to convert documents from electronic records into storage records or output.

## Processing methods

Within the interface definition BC-XDC, two processing methods are described, in order to call the interface functions:

- Synchronized conversion of application and graphic formats
- Unsynchronized conversion with print output via the SAP spool system

Both methods are supported by SEAL Document Conversion Suite for BC-XDC.

## Requirements

The interface is available for SAP WebAS Rel. 6.40 or higher (there are support packages available for older versions).
